

Certero for Mobile

Certero for Mobile goes beyond standard MDM to deliver full management and security for your mobile workforce, from physical devices to the applications that run on them.

Certero for Mobile is a highly automated MDM solution with intuitive administration settings and powerful security features for managing today's mobile workforce.

Certero for Mobile's administration panel makes enrollment, configuration, integration, control and application management quick and easy and with minimal impact or disruption for end users. Comprehensive security features ensure valuable assets are protected and access to (or loss of) sensitive data minimized.

Certero for Mobile is also fully integrated into the Certero platform, which means it can work holistically with all ITAM and SAM tools to provide complete end-to-end visibility of your devices and applications – all via a single, normalized data source.

What makes Certero for Mobile right for you?

- Comprehensive ITAM data
 - Get accurate inventory of enrolled mobile devices
- Improved governance
 - Provides visibility and control over applications
- Powerful security
 - Secure, easy-to-use solution
- iOS and Android operating systems
 - Covers the major device operating systems
- Password enforcement
 - Enforce secure password policies
- Custom administration
 - Easily customize device configurations

An MDM solution with everything you need today – and tomorrow

Comprehensive Device Inventory

All enrolled devices present a comprehensive inventory back to Certero for Mobile, enabling administrators to have full visibility of all the mobile devices across the estate.

Easy and Flexible Device Enrollment

Our mobile device management software simplifies the enrollment process, providing a fast and intuitive solution that requires very little user intervention.

This includes Apple DEP (device enrollment program), Bulk enrollment using QR codes, Certero for Mobile App, and Certero for Mobile Bump – an application which uses an NFC (near field communication) ‘bump’ to pass information from a ‘parent’ device to ‘child’ devices.

Customized Device Configuration and Administration

Our mobile device management software facilitates easy application of configurations. Each configuration includes a number of definitions regarding the options and features that are managed through Certero for Mobile’s device management capabilities.

Powerful Security Features

Certero for Mobile features advanced security throughout, covering all the bases. Corporate data is kept safe and separate from the user’s own private data in a BYOD scenario. This includes, remove wipe, geofencing, disabling devices and password policies.

Android Enterprise

The Android Enterprise capability enables organizations to separate business applications, supporting employees as they use the same Android device for both personal and work purposes. Separate business and personal applications, corporate Appstore and device encryption.

Apple VPP

If you need to distribute paid apps on iOS you can use the Apple Volume Purchasing Program (VPP). By simply logging-in to the VPP portal and downloading the token for your account and adding it into our mobile device management software, organizations are able to gain full visibility of their VPP licenses and their utilization.

Enterprise BYOD

Our mobile device management software has been designed to support both personal devices and corporately owned devices to ensure you can easily incorporate a BYOD (Bring your own device) policy into your overall IT infrastructure. The configurations applied to devices can be defined based on ownership, so that organizations can easily maintain separate policies for each type of device.

Corporate and Public App Stores

Application management within our mobile device management software provides organizations with a simple and easy to use mechanism to publish applications to their users.

Corporate applications are directly uploaded to the Certero for Mobile server which then processes all user installation requests.

About Certero

Certero deliver [as-a-service] IT Hardware, Software, SaaS and Cloud Asset Management solutions and services, to help enable organizations to digitally transform their IT. We do this by challenging the traditional, outdated delivery method of disappointing point solutions, and instead deliver true unification across all platforms, from mobile to main-frame to cloud, delivered as SaaS in days, not months or years. Combined with our self-service solutions we support organizations to drive digital transformation agendas through increased efficiency and automation. With businesses in the UK, USA and Australia, Certero is a customer first company with a passion for customer success, earning the trust of some of the leading global brands across the finance, manufacturing, health, retail and technology sectors. That’s why Certero is viewed number one, year on year for customer service as well as having the highest scores for product capabilities, making Certero a safe, trusted partner to help with your digitally transformation.
