

Training

Certero for Oracle: Database & Middleware

Learn to use Certero for Oracle to manage your Oracle Database estate, including Middleware. Manage your license entitlement and use the Oracle specific features and functionality to prepare an effective license position (ELP).

Attendee Prerequisites

- Attendees should have:
 - Solid understanding of Oracle licensing rules and usage rights
 - Attendees should have experience of generating Oracle ELP's
- Completion of the Certero Essentials training course

Who Should Attend

This course is aimed at staff that will be responsible for adding license entitlement and creating and maintaining an effective license position using Certero. Typically:

- License Management Administrators
- Software Asset Managers
- SAM Consultants

Agenda

- Understanding the Oracle inventory
- Analysis of usage
- Reporting on data
- Entitlement management
- Understanding compliance

Benefits of Attending

- Learn how to maximize visibility of Oracle deployments across your IT estate to reduce the risk of gaps
- Gain a deeper understanding of how the solution inventories Oracle Database and Middleware products
- Learn about the wealth and breadth of Oracle inventory data
- Increase productivity by quickly accessing the information important to your role
- Learn about the specific features available to help you manage your entitlement and maintain your effective license position
- Understand the high levels of automation available within the solution including alerting and reporting – continuous compliance
- Gain an appreciation of the simple yet powerful capability to prepare an accurate submission for Oracle License Management Services (LMS) in the event you are in an audit situation
