

Training

Certero for SAP Applications

This course has been designed by former SAP system administrators to focus on those aspects needed to support the analysis and understanding of usage of your SAP license types, and to identify SAP license assignment optimizations.

Attendee Prerequisites

- Solid understanding of SAP license type and named user administration
- Completion of the Certero Essentials training course

Agenda

- Extracting data from your SAP Systems
- Reviewing extracted and summarized data across all SAP systems
- Entering your SAP license entitlement
- Rule sets
- Named User optimizations
- SAP Package (aka Engine) metrics

Who Should Attend

This course is aimed at staff that have a responsibility to understand the current usage of your SAP named user population so that corresponding license types within SAP can be set, thus these individuals always ensure the license types assigned to users are at an optimal state.

- SAP License Administrators
- SAP System Administrators
- SAP Administrators
- Those involved in GRC administration of your SAP systems

Benefits of Attending

- Understand how to quickly and efficiently obtain usage data from all your SAP systems
- Learn how to define and automate user analysis rules to ensure an optimized view of license type assignments is always available
- Learn about the wealth and breadth of SAP transactional usage data
- Understand how SAP Package metrics are obtained
- Increase productivity by quickly accessing the information important to your role
- Learn about the specific features available to help you manage your entitlement and maintain a position of optimized usage
- Understand the high levels of automation available within the solution including alerting and reporting – continuous optimization
