

Training

Certero PowerStudio

This course is a practical, hands-on session covering the full setup and configuration of PowerStudio to reduce energy consumption and drive both cost and carbon savings within your organization. This includes the creation and configuration of power schemes and policies along with defining the rules to automate the assignment of the power schemes to devices. To show the savings that are being achieved by the organization we will cover the flexible reporting that can be delivered by Acquaintia the reporting engine.

Attendee Prerequisites

- Experience of using web browser-based applications would be an advantage
