

Certero for SaaS - Tableau Module

Manage your Tableau SaaS subscription more effectively: avoid Bill Shock, Cloud Sprawl, Shadow IT and Toxic Consumption

Challenge

In many enterprises, the starters and leavers process is often poorly managed and can cause many issues for IT and other departments. Typically, leavers' hardware and software assets are not properly tracked and organizations waste a lot of money purchasing extra equipment for new starters, rather than re-harvesting existing assets. The same is true for SaaS solutions like Tableau.

As organizations migrate to the cloud, the need for Business Intelligence increases and Tableau (now owned by Salesforce) provides a method of exploring and managing the data. With data becoming more and more critical to business success, the demand for access to applications such as Tableau to data mine is increasing, along with the need to be able to create views and interact with the data on mobile as well as traditional desktop platforms.

Managing license subscriptions can be complex with the differing demands of cloud and on-premises or Hybrid solutions, being able to track and manage the usage and instances across all platforms in a single solution is key. This will enable the re-harvesting of licenses and can avoid the need to buy additional licenses.

- Obtain Detailed Management Reports
- Identify Unallocated Subscriptions
- Improve Starters and Leavers Process
- Optimize Subscription Levels

Solution

With out-of-the-box automation, a single source of granular data and advanced analytics, Certero's Wrike module gives you single pane of glass visibility of your applications and full control over your use of Wrike and expenditure, as part of the world's most advanced and modern SaaS Licence Management solution.

Certero's Tableau license management and optimization module removes all of these problems by giving you greater visibility and control over your estate, so you can achieve real cost savings.

Benefits

Certero's Tableau license management and optimization module gives you greater visibility and control to achieve real cost savings through subscription optimization.

- Automate the consolidation of user, server and add-ons subscriptions
- Improve visibility and accountability of starters and leavers processes
- Reduce the cost of unused and unallocated subscriptions
- Provide management and other decision makers with visibility of Tableau expenditure
- Manage all cloud applications within Certero for SaaS, on the Certero Platform
