

ITSM & CMDB Integration

Certero's advanced discovery & inventory capabilities are ideal for populating the CMDB & providing detailed IT asset information to any kind of IT Service Desk

Integrate your ITSM tool with ITAM & SAM functionality from Certero

A fundamental requirement of an effective CMDB or ITSM solution is the ability to populate it with comprehensive IT asset information from across the network. Yet the majority of CMDB implementations fail and service desk operatives are often operating blind when it comes to the assets being used by staff.

Certero makes populating the CMDB with a wide range of Configuration Items (hardware and software assets) and providing help desk staff with access to full information on users' IT equipment and usage a reality.

Certero brings many benefits to your ITSM system

- Accelerate problem resolution times
- Improve end user experience
- Improve service desk staff productivity
- Reduce the cost of service delivery

The most efficient & effective way to populate the service desk with inventory

Multi-platform inventory & discovery

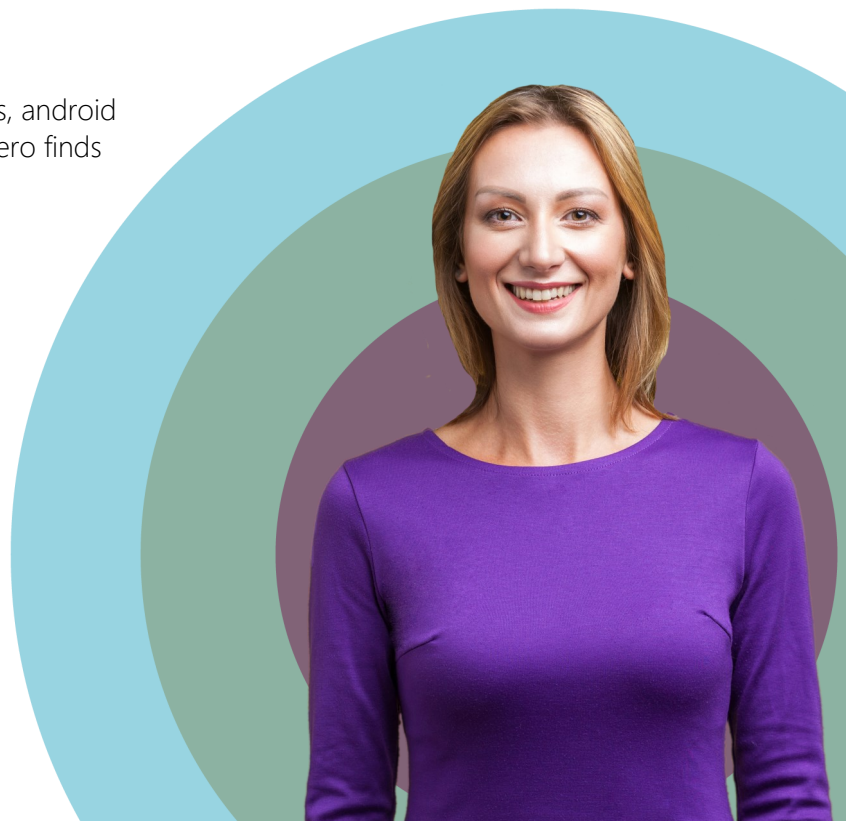

From windows PCs and laptops to Unix/Linux servers, android phones to IP telephones, printers and switches, Certero finds all types of devices on the network.

Agent & Agent-less scanning

Speed up problem resolution and avoid change control challenges by using agent-less scanning. Deploy agents directly without the need for third-party distribution software.

Software normalization

Ensure all software captured in the CDMB or ITSM application is normalized for easy recognition and management. Ensure all software captured in the CDMB or ITSM application is normalized for easy recognition and management.

The most efficient & effective way to populate the service desk with inventory

In addition to the most comprehensive IT asset discovery and inventory capabilities, the Certero Unified Platform offers advanced ITAM and SAM functionalities, which can dramatically increase your organization's technology governance capabilities and improve the ability of your service desk staff to deliver value to the organization. Certero's wider capabilities include:

Hardware Lifecycle Management

From procurement to disposal, track hardware asset status, configuration, location, usage and more.

Software Asset Management

Manage and optimize licensing for not only desktop vendors but expensive enterprise software applications

Self-Service

From password reset to populating the enterprise app-store, help users self-serve their basic IT needs

Why your ITSM inventory tool is letting you down

Most discovery and inventory tools that ship as standard with ITSM tools just aren't up to the job, with limited discovery capabilities, platform coverage, software usage metering, restrictive support of software publishers and ineffective software recognition and normalization:

	Discover new devices	Windows	Non-Windows	Network Devices	Software Recognition	Support for Enterprise Software	Hardware Lifecycle Management	Software License Management
ITSM inventory	N	Y	N	N	?	?	?	?
Certero	Y	Y	Y	Y	Y	Y	Y	Y

To truly make your ITSM solution the center of your IT operations, you need a more effective inventory solution, the ability to manage the entire lifecycle of hardware assets and the ability to manage software licensing. All of which you get with Certero.

About Certero

Certero deliver [as-a-service] IT Hardware, Software, SaaS and Cloud Asset Management solutions and services, to help enable organizations to digitally transform their IT. We do this by challenging the traditional, outdated delivery method of disappointing point solutions, and instead deliver true unification across all platforms, from mobile to main-frame to cloud, delivered as SaaS in days, not months or years. Combined with our self-service solutions we support organizations to drive digital transformation agendas through increased efficiency and automation. With businesses in the UK, USA and Australia, Certero is a customer first company with a passion for customer success, earning the trust of some of the leading global brands across the finance, manufacturing, health, retail and technology sectors. That's why Certero is viewed number one, year on year for customer service as well as having the highest scores for product capabilities, making Certero a safe, trusted partner to help with your digitally transformation.
